# Santenay Maladière

PREMIER CRU

## LOCATION

*Sitting on a fissured limestone base covered in a thin layer of loam, Maladière is a steep rocky hillside which is south-east facing.*

## IN THE VINEYARD

*The parcel was planted in 2013 and covers 57 ares. The ground is ploughed, the vines de-budded, trained, de-leafed, aerated and harvested by hand.*

## VINIFICATION

*The grapes are pressed, the must is lightly clarified before being placed into barrels. Alcohol fermentation is achieved with indigenous yeast.*

## MATURING

*Malolactic fermentation is entirely carried out during the winter months, in our underground cellars. We use 350 liters barrels for this cuvée.*

## SPECIFICATIONS

Alcohol content : 13%vol.  
Ageing Potential : 5 years  
Serving : 12°C

Do not hesitate to contact us by e-mail for any further information.
