

# Meursault Les Meix Chavaux

## LOCATION

*This parcel is situated half way up a hillside, on limestone-clay soil with a predominantly limestone base. It is south-east facing. The parcel was planted with 10 000 vines per hectare, in 1988 and 2001, with older vines dating back to 1935. It covers a surface of 0.75 hectares.*

## IN THE VINEYARD

*Pruned in the single Guyot style. The ground is worked with different ploughs. The vines are de-budded, de-leafed on rising-sun side, manually, in order to get the bunches of grapes used to the sun and to aerate the foliage. Harvesting is done by hand.*

## VINIFICATION

*The grapes are pressed, the must is lightly clarified before being placed into barrels. Alcohol fermentation is achieved with indigenous yeast.*

## MATURING

*Malolactic fermentation is entirely carried out during the winter months, in our underground cellars. We use 350 litre barrels.*

## SPECIFICATIONS

Alcohol content : 13%vol.  
Ageing Potential : 5 years  
Serving : 12°C

Do not hesitate to contact us by e-mail for any further information.
